

# Post Internal Brainstorm Confluence → Jira Product Discovery Ticket Creation

- Efficiently Moving Confluence Tickets Into Jira Product Discovery
  - Individual ticket Creation

## Efficiently Moving Confluence Tickets Into Jira Product Discovery

### Individual ticket Creation

1. For any individual ideas that you feel belong in Jira product discovery, click on the sticky, and select “Create a Jira work item”

2. A pop-up will appear:

A screenshot of a "Create a Jira work item" pop-up form. The form has the following fields:

- Site: A dropdown menu with "horizonmedia" selected.
- Project: A dropdown menu with "CRO Ideation" selected.
- Work type: A dropdown menu with "Idea" selected.
- Summary: A text input field containing "More broadly - want to put on the Plans L".
- Assignee: A dropdown menu with "Jordan Shapiro" selected.

At the bottom left, there is a checkbox labeled "Show more fields". At the bottom right, there is a blue "Create" button.

3. Select the “CROID” project type, “idea” work type, and any other relevant fields:
  - a. **Additional fields you may want to fill:** **Probably fill**, **Maybe fill**, **Probably won't fill**
  - b. Keep in mind that KPIs, CRO Clients, Themes, Swimlanes, and Customer segments must be present in CROID board field to be available in Confluence ticket creation
    - i. **Primary KPI**
    - ii. **Hypothesis**
    - iii. **CRO Client**

iv. **Description**

v. **Theme**: Broader CRO themes applicable across clients

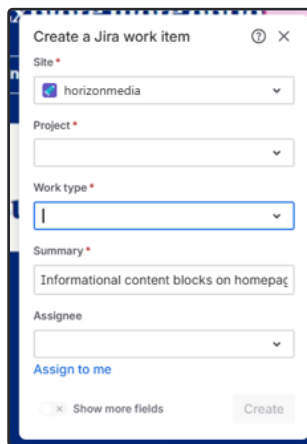

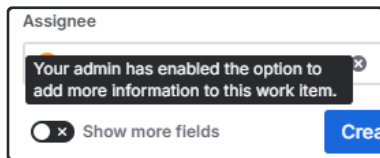

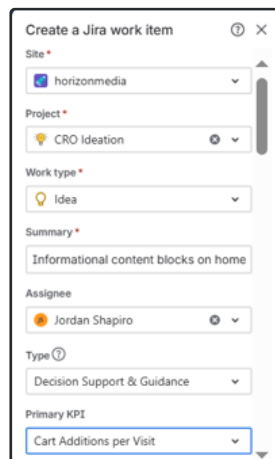

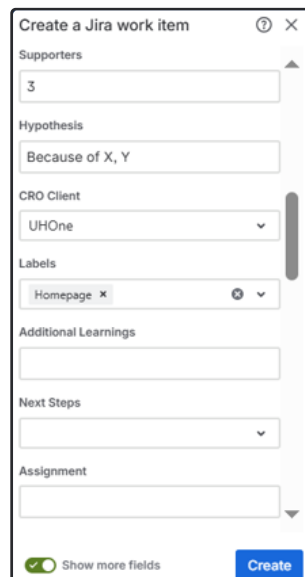

vi. **Swimlane**: Page targeting

vii. **Roadmap**: Will be “ideating”

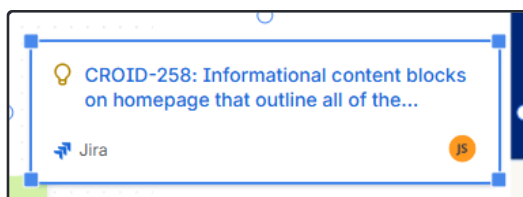

viii. **Customer segments**: Ex: New, Return, Desktop, Mobile, Users who previously did X

ix. **Supporters**: Number of people who liked the idea

x. **Type**: Roadmap pillar – only if you already know the roadmap pillar for the ticket

A screenshot of the "Create a Jira work item" form. The "Site" dropdown is set to "horizonmedia". The "Project" dropdown is empty. The "Work type" dropdown is set to "Idea". The "Summary" field contains the text "Informational content blocks on homepage". The "Assignee" dropdown is set to "Assign to me". At the bottom, there is a "Show more fields" toggle (off) and a "Create" button.A screenshot of the "Create a Jira work item" form. The "Site" dropdown is set to "horizonmedia". The "Project" dropdown is set to "CRO Ideation". The "Work type" dropdown is set to "Idea". The "Summary" field contains the text "Informational content blocks on home". The "Assignee" dropdown is set to "Jordan Shapiro". The "Type" dropdown is set to "Decision Support & Guidance". The "Primary KPI" dropdown is set to "Cart Additions per Visit". At the bottom, there is a "Show more fields" toggle (off) and a "Create" button.A screenshot of the "Create a Jira work item" form. The "Supporters" field contains the number "3". The "Hypothesis" field contains the text "Because of X, Y". The "CRO Client" dropdown is set to "UHOne". The "Labels" field contains the text "Homepage". The "Additional Learnings" field is empty. The "Next Steps" dropdown is empty. The "Assignment" field is empty. At the bottom, there is a "Show more fields" toggle (on) and a "Create" button.

4. Hit create to turn the sticky into a ticket:

5. This ticket will now appear in the “Test Ideas” view for the relevant CRO Client:

a. And from there you can score the idea based on Impact, Ease, and Confidence
