

Road-mapping Audit Process

Defining Goals

What is done:

1. Take client goal (Ex: Revenue) and break that into measurable & actionable KPIs
 - a. **Who does it:** CRO + CX + Accounts
 - b. CRO + CX identify site actions that contribute to bigger picture goals and define them concretely
2. Separate KPIs into primary, secondary and guardrail
 - a. **Who does it:** CRO + CX + Accounts
 - b. **Primary KPIs** can logically, directly be impacted by site actions and easily tie into the bigger picture goal
 - c. **Secondary KPIs** are either more difficult to affect or less directly correlated with main goal
 - d. **Guardrail KPIs** are either very difficult to affect (generally far downstream of primary metrics) or not directly correlated with the main goal

External Trends & Opportunities

What is done:

1. Environment research
 - a. **Who does it:** CX
 - b. Spend time online and interviewing client to gain understanding of the market, what matters, what's changing, and how the client fits in (SWOT)
 - c. Include audience and product recommendations in SWOT
2. Competitive audit
 - a. **Who does it:** CRO + CX + CRM
 - b. Spend time on competitor sites to identify trends – if it's good enough for them, it's probably good enough for us
 - c. Spend time on digital marketing leaders' sites to identify trends – if it's good enough for them, it's probably good enough for us
 - d. Sign up for and research competitor emails featuring cross/upsell to identify trends that can be used in future campaigns
3. Best practices / meta analysis audit:
 - a. **Who does it:** CRO + CRM

- b. Consolidate best practices across meta-data platforms (Ex: GoodUI) and validate if best practices are present on the client site
- c. Highlight known wins and how we can leverage with best practices to create a program for cross/upsell

Client Performance & Opportunity Audit

Website Audit

What is done:

1. Historic successes / failures
 - a. Existing engagements – Interview internal teams
 - b. New Engagements – Interview client
 - c. **Who does it:** CX
 - d. Spend time interviewing client / internal teams to gain understanding of previous activities and their success
 - e. Also identify any known pain points
 - i. Include user testing data
2. Evaluate primary and secondary KPIs over time and across important segments
 - a. **Who does it:** Analytics + CRO & CX reviews
 - b. Graph all KPIs over 12- and 24-month periods (if data is available), breaking it down by important segments, which generally include: Desktop vs mobile, new vs return, media channels, and geographies
3. Identify high impact optimization locations
 - a. **Who does it:** Analytics + CRO & CX reviews
 - b. Identify areas / segments of the site that have either high traffic OR high volume of conversions
 - c. Also call out any locations / segments with disproportionate sessions and conversions
4. Evaluate funnel for points of friction
 - a. **Who does it:** Analytics + CRO & CX reviews
 - b. Include breakdown by important segments

Tech

What is done:

1. Evaluate site for templaticization, dynamic content, and unique implementations
 - a. **Who does it:** CRO + Web Dev

- b. Identify page / component templates and across which locations they are consistent
- 2. Evaluate current testing platform implementations
 - a. **Who does it:** CRO + Web Dev

Data Infrastructure Audit

What is done:

- 1. Tracking validation
 - a. **Who does it:** Analytics
 - b. Ensure all KPIs and major segments are tracked
 - c. Identify gaps in tracking if they exist
- 2. Data cleanliness audit
 - a. **Who does it:** Analytics
 - b. Assess any inconsistencies across platforms, duplicative events, datasets without fields to join on, and need for consolidated dataset
- 3. Platform set-up validation:
 - a. **Who does it:** Analytics
 - b. Ensuring analytics platform is structurally sound and appropriately classifying information

Road-mapping

What is done:

- 1. Finalize strategic pillars: 1 hour meeting with prep
 - a. **Who does it:** Accounts + CRO + CX + Analytics + Creative
 - b. Internal Confluence Whiteboard ideation: [📄 Pre Road-mapping Ideation Template](#)
 - i. All contributors will have 5 business days to include their ideas followed by a meeting to discuss and build on each other's thoughts
 - c. Idea Clustering: Ideas will then be clustered into themes and initiatives - **Done by** CX + CRO
 - d. Theme Identification - **Done by** CX + CRO
 - i. Themes become pillars
 - ii. Break down themes into 1 - 3 sub-themes, each with multiple tests that can be turned into initiatives - **Done by** CX + CRO
 - e. Align on final pillars and initiatives

Dependency Identification

What is done:

1. Identify recommended projects or workstreams that are dependent on others

a. **Who does it:** PM

- i. Identify projects that are roadblocks for others and which projects they impact
- ii. Projects that prohibit major activities are “Critical path projects”
- iii. Includes rough timeline delivery
